

# Car Rental Management Software

(A Web Based application)

## Project Overview

Car rental management software is a unique and innovative web based software. With this software customer can book a cab online, can track the status and driver details of own booking.

Admin can generate bill and receive payment and can see sale register branch wise. Since this is a web based software so that you can also see branch wise cab booking detail or sale register with multiple branch on a single click from anywhere.

## Salient Features

- On line cab booking
- Customer can track own booking status or driver details.
- Easily bill generation
- See the status of Pending and Receive payment against bill.
- Handle more than one branch account.
- Easy customer management.
- Multiple Reports
